PROFILE

I am a first-year Software Engineering student at Kocaeli University, developing myself in artificial intelligence, data science, and project management. I adopt a proactive, planned, and solution-oriented approach in both academic and personal projects. I am a team-oriented, innovative learner who is open to new ideas and focused on using technology effectively.

EXPERIENCE

STEELORBIS - ASSOCIATE SOFTWARE ENGINEER

(2025 September - 2026 June)

- Identifying bugs during QA testing, reporting findings, and developing solution proposals
- Supporting business analysis processes by determining requirements and improving workflows
- Taking part in quality control steps within software development processes

YAPAY ZEKA VE TEKNOLOJİ AKADEMİSİ

Scrum Master & Developer

(2025 June - 2025 August)

- Managing the graduation project that reached the bootcamp finals as Scrum Master
- Playing a key role in the AI engine, data processing, and web development parts of the project
- Collaborating in an agile team and contributing to coding, planning, and product development

Trainee

(2024 December - 2025 August)

Google Türkiye – Girişimcilik Vakfı – T3 Girişim Merkezi Joint Program

- Receiving training and gaining experience in data science, project management, and software development
- Improving teamwork and collaboration skills while developing software projects
