PROFILE

I am a 2nd-year Software Engineering student at Kocaeli University. I am developing myself in the fields of artificial intelligence, data science, and project management, and I adopt a proactive, planned, and solution-oriented approach in my academic and personal projects. I am a student who is inclined to teamwork, open to innovative ideas, and focused on using technology effectively.

EXPERIENCE

STEELORBIS - ASSOCIATE SOFTWARE ENGINEER **(September 2025 - Present)**

Contribute to AI projects, automation, and testing processes at SteelOrbis, an iLab Group company, as a Software Engineering undergraduate student:

- Research new AI tools, evaluate their use cases, and contribute to their implementation in internal projects.
- Support automation projects and develop automation workflows to reduce repetitive business tasks.
- Track tasks with Kanban, analyze requirements, turn them into actionable items, and test features to find bugs and improve product quality.

YAPAY ZEKA VE TEKNOLOJİ AKADEMİSİ

Scrum Master & Developer **(June 2025 - August 2025)**

- Conducted project management as Scrum Master in the "PharmAI" (AI-Powered Drug Guide) project, which became one of the 7 finalists during the Academy's bootcamp process
- Played an active role as a developer in the AI engine, data processing, and web development side

Trainee **(December 2024 - August 2025)**

- Participated in the program by Google Türkiye, the Entrepreneurship Foundation and T3 Startup Center
- Received training and experience in data science, project management, and software development
- Actively developed teamwork and collaboration skills while developing software projects
